

# MOULTON COLLEGE

## RENEWABLE TECHNOLOGIES CENTRE

(BPEC Accredited Centre)

Moulton College offers specialised courses for Solar Domestic Hot Water Heating Systems and Rainwater Harvesting Systems in the new renewable energy centre.

The courses are led by experienced professional lecturers and include a series of training manuals specifically designed for the plumbing and heating industry to assist in responding to ever changing environmental designs and consumer requirements.

### Solar Domestic Hot Water Heating Systems

This course is aimed at candidates who have experience in the plumbing and heating industry, who hold a formal NVQ Level 3 Qualification in Plumbing and Heating or who are currently studying towards this qualification.

Cost: £300 for 2 days training and assessment.

In addition, we offer candidates who have not achieved the above qualifications an introduction course.

Cost: £200 for the 2 day introduction course which will run with the training and assessment courses.

### Rainwater Harvesting including Grey Water Systems

This course is aimed at qualified Building and Services Engineers or Plumbers who would like to design and install Rainwater Harvesting Systems. Training will enable the installer to select the most appropriate system to meet customer's installation requirements, maintenance and service.

Cost: £300 for 2 days training and assessment.

Contact Phil Coy or Emma Arthurs on 01604 491131 or email: [emma.arthurs@moulton.ac.uk](mailto:emma.arthurs@moulton.ac.uk) for further information
